

Worksheet for the webinar: MUSHROOMS IN NATURE – OUR HELPERS

WORD PUZZLE: spell the correct words. What do they mean?

ZHRIMYOACR =

Meaning?

SIOSMISBY =

Meaning?

IDENTIFY THE PLANTS: in which photos can you see fungi?

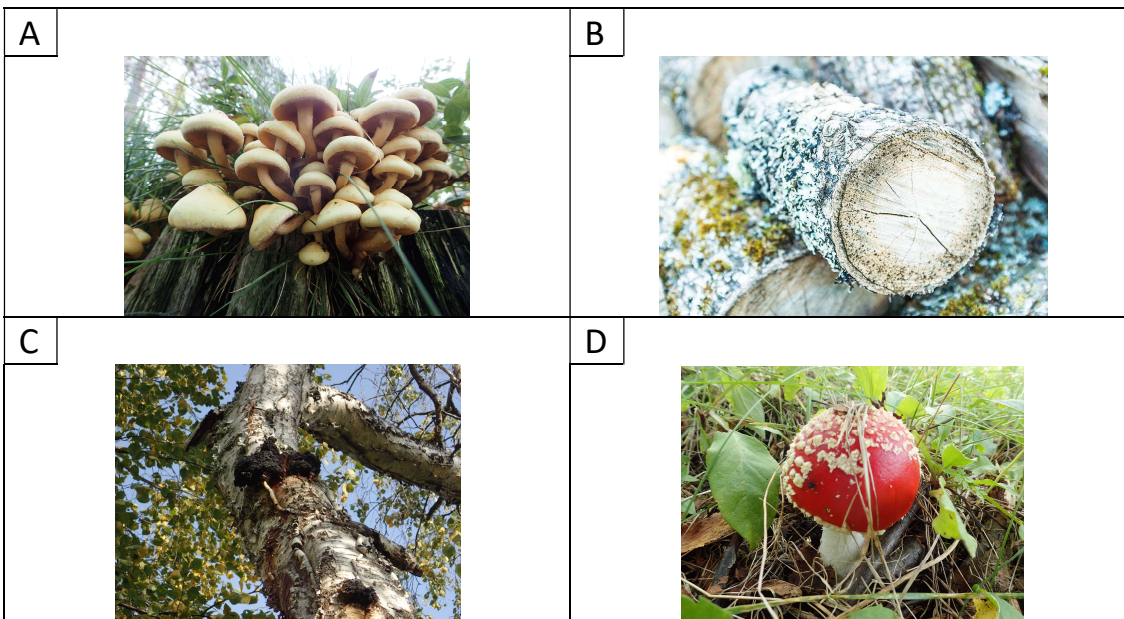

Photo B): Kim André Fladen, CC BY-SA 4.0 (<https://creativecommons.org/licenses/by-sa/4.0>), via Wikimedia Commons)

Describe briefly three services that mushrooms in nature do which benefits people:

.....

.....

.....

Fungi often co-exist with plants. Show where on the plants you think fungi may live

POLARPEDIA: Connect term (left column) to the correct sentences (right column).

1. symbiosis

2. parasitism

3. mycorrhiza

A. Parasitism occurs when one organism lives off another organisms that gets none of the benefits.

B. Mycorrhiza is symbiosis between a fungus and a plant.

C. Symbiosis is tight co-living of two organisms, often separate species, with benefits for both.
